

Skill Gap Report

Readiness Score: 33%

Strengths:

Machine Learning, Nlp, Deep Learning, Python, SQL

Missing Skills:

Statistics, Probability, Data Visualization, Cloud Platforms, MLOps, APIs, Docker, Kubernetes

Skill Gaps:

Data Visualization - Preferred skill for data analysis

Cloud Platforms - Familiarity with cloud platforms is preferred

MLOps - Nice to have skill for model deployment

APIs - Nice to have skill for model deployment

Docker - Nice to have skill for containerization

Kubernetes - Nice to have skill for container orchestration

Roadmap:

Week 1: Learn Statistics and Probability

Day 1: Introduction to Statistics

Day 2: Descriptive Statistics

Day 3: Inferential Statistics

Day 4: Introduction to Probability

Day 5: Conditional Probability

Day 6: Bayes' Theorem

Day 7: Practice Problems

Week 2: Learn Data Visualization

Day 1: Introduction to Matplotlib

Day 2: Plotting with Matplotlib

Day 3: Introduction to Seaborn

Day 4: Visualization with Seaborn

Day 5: Customizing Visualizations

Day 6: Practice Visualizations

Day 7: Project - Visualize a Dataset

Week 3: Learn Cloud Platforms

Day 1: Introduction to AWS

Day 2: AWS Services

Day 3: Introduction to GCP

Day 4: GCP Services

Day 5: Comparing Cloud Platforms

Day 6: Practice Deploying a Model

Day 7: Project - Deploy a Model on Cloud

Week 4: Learn MLOps and APIs

Day 1: Introduction to MLOps
Day 2: MLOps Tools
Day 3: Introduction to APIs
Day 4: API Design
Day 5: API Deployment
Day 6: Practice Deploying an API
Day 7: Project - Deploy a Model using API

Top Tip: Focus on learning statistics and probability, and practice data visualization using Matplotlib and Seaborn.
